How do I find today’s 22ct gold price for jewellery in the UK?

Gold Prices & Rates · https://www.purejewels.com/faqs/gold-prices-rates/how-do-i-find-todays-22ct-gold-price-for-jewellery-in-the-uk/

To find today’s **22ct gold price for jewellery in the UK**, you can follow these trusted and transparent methods:

1. Check a Reputable Jeweller’s Website

To find today’s **22ct gold price for jewellery in the UK**, we recommend checking **live gold price charts from reputable UK bullion dealers** to understand the current 24ct spot price, which serves as the benchmark for calculating the 22ct rate used in jewellery.

2. Refer to Live Gold Rate Charts

Although many platforms show the **spot price** of 24ct gold, keep in mind that **22ct gold is 91.6% pure**. You can calculate the 22ct rate using:

22ct Gold Price = 24ct Spot Price × (22 ÷ 24)

For example, if 24ct is £80/gram, then:
22ct ≈ £73.33/gram

3. Understand the Final Jewellery Price

The retail price of 22ct jewellery includes more than just gold weight. It may also include:

- **Making charges**
- **VAT (if applicable)**
- **Design complexity or exclusivity**

At **PureJewels**, these costs are **clearly itemised**, and each piece is **hallmarked by the London Assay Office**, ensuring quality and transparency.
